AI-OPERATED REDACTION TECHNOLOGY

eXolution harnesses the power of Artificial Intelligence (AI) to transform native file redaction. Unlike traditional solutions that rely on manual processes or basic automation, eXolution's advanced AI intelligently adapts to your natural language commands - written or spoken - to instantly identify, mask, and redact sensitive information across large collections of documents.

Automated Detection & Redaction with AI

Efficiently detect and remove sensitive information such as Social Security numbers, credit card numbers, birthdates, and other custom-defined data using advanced AI-driven pattern recognition and intuitive keyword searches.

Instantly apply redactions across duplicate and visually similar documents in real time, reducing manual effort by over 90% and minimizing the risk of human error.

Next-Generation AI Features for Complex Tasks

SPEECH TO REDACT

TEXT TO REDACT

Platform Compatibility & Seamless Integration

Platform-Agnostic: Standalone version offers unparalleled flexibility - redact independently of your existing review processes.

Industry-Leading Integrations: Seamlessly integrated with top-tier platforms (Casepoint, Reveal, Relativity) making it instantly available and streamlining your workflow.

Supported file formats include

Excel, Word, CSV, PDF, RTF, MHT, EML, ODS, ODT, TIFF, Emails, Text files, and Images.

Standalone & Integrated with

Why AI Matters?

AI brings a breakthrough in understanding human intentions expressed in natural language - a capability that was missing until the advent of AI. eXolution leverages AI's cognitive abilities to accurately interpret user needs expressed in English, German, Spanish, French, Italian, CJK, and many more languages and perform the corresponding actions.

eXolution combines flexibility and power with dual interfaces - Web and Desktop.

- **Web Viewer:** Convenient, instant accessibility from anywhere.
- **Desktop Viewer:** Efficiently handles large files, providing optimal performance on large documents volumes.

Highly Advanced Redaction Options

Spreadsheet complexity makes data redaction challenging. eXolution's capabilities provide:

- **Row/Column-Based Redactions:** Accurately redact entire rows or columns quickly and intuitively based on searches.
- **Inverse Redaction:** Rapidly specify exceptions to produce responsive data while automatically redacting everything else.
- **Search-Based Redaction:** Efficiently execute global searches and instantly redact millions of values across large document collections.
- **Advanced Header Row Detection:** Automatically detects header rows, ensuring consistent redaction across duplicates or visually similar sheets, significantly reducing human errors and inconsistencies.
- **Automated Exposure of Hidden Content:** Instantly unhide concealed or password-protected sheets, rows, and columns for comprehensive redaction.

eXolution

● Redaction ● Pseudonymize ● Anonymize

Automated Detection & Redaction

Quickly detect and redact sensitive data such as Social Security numbers, credit card numbers, birth dates, and custom-defined information using advanced AI-driven pattern recognition and intuitive keyword searches.

Instantly propagate redactions across duplicate and visually similar documents in real-time, reducing human effort and errors by over 90%.

Uncover and Secure Hidden Data

AI-driven algorithms automatically reveal hidden, encrypted, or concealed content, preventing accidental leaks of sensitive information.

Automatically removes internal passwords, ensuring visibility and secure redaction of data beyond page boundaries or spreadsheet cell limits.

Why eXolution?

AI-Powered Efficiency

AI-powered simplification and efficiency of complex and conditional redaction requirements.

Ease-of-Use

Requires minimal user training, eliminating resource-intensive onboarding and enabling your teams to focus on higher-value strategic tasks.

Complex Task Automation

Innovative automation and sophisticated spreadsheet capabilities make eXolution uniquely capable of handling the toughest redaction challenges without learning curve.

Multilingual & Scalable

Supports clients globally with multiple languages, providing secure, reliable redaction solutions suitable for international firms and enterprises.

Litexn is a leading legal technology company harnessing AI to redefine redaction and data protection. With groundbreaking solutions like eXolution, Litexn is accelerating the future of legal tech.
